Uncover the right patients & boost trial enrollment with Citeline PatientMatch

Citeline PatientMatch delivers custom-timed alerts when patients receive lab or biomarker results that could make them eligible for a study.

Never miss a relevant patient for your study

Reduce the volume of patients to screen

Get the full picture with connected Citeline data assets

Enrollment opportunities are easy to miss – especially for clinically complex patients

50%

Surge in eligibility criteria for clinical trials over 30 years¹

70%

Study teams who identify finding eligible participants as their primary obstacle²

36.8%

Clinical trial sites that lack adequate access to EMRs or reliable data²

Sources: 1. Journal of Thoracic Oncology
2. NIH

The solution: Citeline PatientMatch

Citeline PatientMatch leverages a comprehensive view of patients, diseases, and providers to precisely identify protocol-specific populations within your site network. Then, an alert cadence is activated to notify investigators and HCPs when an eligible patient presents in the clinic.

How does Citeline PatientMatch work?

Citeline PatientMatch draws from a wide range of data sources:

Lab & biomarker data

Site, investigator & physician data

Claims & electronic medical records data

Partner with our in-house subject matter experts to select the optimal combination of real-world data needed to find the right patients for your trial and tailor the alert cadence precisely to your unique needs.
