CITELINE

CLINICAL

Investigator SmartSelect

Providing principal investigator recommendations at the speed of Citeline

Selecting the investigators who will conduct your clinical research can be the difference between success and failure. It also can eat up weeks of your study planning time.

Find the investigators you need to deliver your trial.

Leveraging AI-enabled technology that's built on industry-leading Sitetrove and Trialtrove data, Citeline Investigator SmartSelect delivers a list of high-performing investigators who have the experience and the capacity to deliver your trial, on time and on budget.
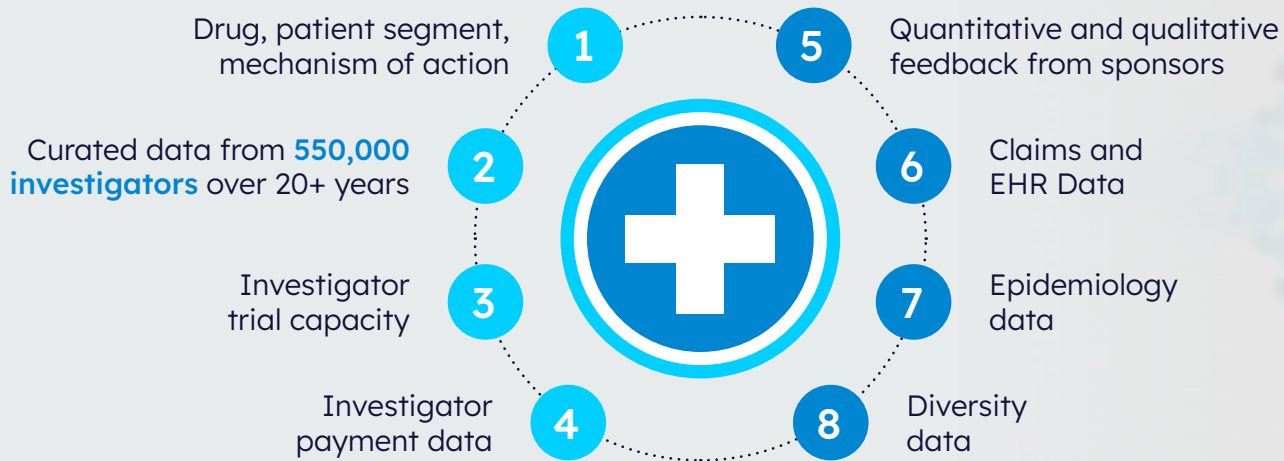

TRANSFORMING THE WAY YOU SEE THE WORLD

CITELINE.COM /AI

Powerful AI starts with trusted and reliable data

AI is only as good as the data behind it—and ours is the best.

1 Drug, patient segment, mechanism of action

2 Curated data from **550,000 investigators** over 20+ years

3 Investigator trial capacity

4 Investigator payment data

5 Quantitative and qualitative feedback from sponsors

6 Claims and EHR Data

7 Epidemiology data

8 Diversity data

Leverage the power of AI trained on the industry's leading investigators and site data to **identify the best-fit investigators** for your trial.

Dig deeper with our user-friendly dashboard:

Diving into details
View criteria for every recommended investigator, including their capacity, experience, location, affiliation, patient pool, and whether you've worked with them before.

Key metrics
Access key metrics on patient population, investigator experience, and study analytics to guide your strategy.

Counts count
See recommended investigators' patient counts at the disease level.

Goal alignment
Track investigator selections against your goals to ensure you have the right mix of investigators by country.
