

Trial Transparency Starts Here

Trial Summaries provides an unbiased and non-promotional portal for sponsors to share Clinical Trial information such as summaries of protocols, results, journals and other relevant information, with participants and public.

It's the law

- Under EU Regulation 536/2014, sponsors must provide summaries of study results that are understandable to the general public.
- This requirement is recognized by the World Medical Association, the Pharmaceutical Research and Manufacturers of America (PhRMA) and the European Federation of Pharmaceutical Industries and Associations (EFPIA).
- Guidance and recommendations are provided by the Multi-Regional Clinical Trials (MRCT) Center and TransCelerate.

It's best practice

Trial sponsors face ethical, organizational and legal obligations to communicate trial results to participants. Best practices dictate that study information should not have a commercial or marketing appearance, and that the summaries are made available in a non-promotional context.

It's time- and cost-efficient

Paper-based distribution at study sites can be costly, time consuming, unreliable and hard to track. As a result, trial participants often don't receive valuable study information.

MISSED OPPORTUNITY

43%

of participants received a report or update on the results once their study finished

31%

of participants never heard back from anyone after a trial study

Center for Information and Study on Clinical Research Participation's (CISCRP) 2019 Perceptions & Insights Study.

What is the Trial Summaries Portal?

TrialSummaries.com is the world's largest source for plain language summaries. This public portal aggregates clinical trial results summaries from participating sponsors and presents them in a simple, searchable interface.

Because the portal includes summaries from multiple sponsors, those studies are seen by a broader audience than ones posted on a sponsor's website alone.

AstraZeneca 

[Participants] appreciated the simplicity of the site compared to ClinicalTrials.gov, where they had difficulty finding clinical trial information.

Julie Holtzople, Clinical Trial Transparency Operations Director

Subscriptions for email alerts when results are published

Simple and secure posting of trial results summaries in a single, brand-agnostic website

Trial summaries available in 45 languages

Eliminates manual distribution and tracking of printed summaries to trial participants

Encrypted to Citeline's high standards of data security

Automated data entry through integration with the TrialScope Disclose™ platform
